

SMART AND HIGH EFFICIENT RADIO MODEM FOR FAST DATA TRANSMISSION

HIGH PERFORMANCE WIRELESS DATA LINKS

HX-DU8616D is an advanced, high speed, high power wireless data link built to withstand the demanding conditions of GNSS/RTK surveying and precise positioning. Due to the 35W high transmitting power, connection distances up to 20 kilometers can be covered in favorable conditions. It is designed with a ruggedized IP67 weatherproof enclosure to withstand extreme environments.

INTELLIGENT SERIAL BAUD RATE IDENTIFICATION

HX-DU8616D supports intelligent serial baud rate identification function for different RTK devices. It can automatically identify RTK serial baud rate with radio data cable and provide a plug and play form for easy connection between eRadio and RTK.

MULTIPLE OPERATING MODES

HX-DU8616D is an easy-to-use radio modem that provides dependable performance as either a base, or radio repeater working with other Harxon radio modems in challenging environments. In the store and forward operating mode, eRadio receives messages, buffers the received data, and transmits further to another substation.

CONVENIENT MOBILE APP OPERATIONS

The user programmable eRadio also supports the Bluetooth of APP to configure data and updates radio status. Its diagnostic reporting software can realize the built-in reliability monitoring, such as internal temperature, environment status, battery level and channel inspection etc., these features allow users to both anticipate and deal with potential issues efficiently.

MULTIPLE COMMUNICATION PROTOCOLS

HX-DU8616D is a highly versatile device that is capable of supporting multiple communication protocols, including ETALK, TRIMTALK™, TRIMMARK™3, Transparent-EOT, SATEL®, and the unique ETALK communication protocol developed by Harxon. With this wide range of communication protocols, HX-DU8616D is able to connect and communicate with a variety of different devices and systems.
